

Designing Competency-Based Assessment Systems

Professional Portfolio Artifact

Focus Areas

Assessment Systems | Competency Frameworks | Skills Architecture | Learning Measurement | Quality Assurance

Overview

A structured approach to translating professional competencies into measurable assessment systems that support meaningful capability evaluation.

Professional Context

This artifact demonstrates an approach to connecting skills, learning outcomes, assessment design, and quality practices.

Prepared by: Saheli Basu

Version 1.0

Designing Competency-Based Assessment Systems

Overview

Designed assessment systems that translate professional competencies into measurable learning and evaluation approaches.

The work focuses on creating assessments that are aligned with skills, learning outcomes, and real-world capability requirements.

Challenge

Organizations often struggle with:

- unclear skill expectations
- inconsistent assessment quality
- assessments disconnected from workplace capability
- difficulty maintaining assessment relevance over time

Solution Delivered

Developed assessment system components including:

- Competency frameworks
- Skills taxonomies
- Assessment blueprints
- Evaluation criteria
- Expected-answer structures
- Quality review approaches
- Assessment lifecycle processes

Assessment Quality Approach

Focused on:

- Content validity
- Question clarity
- Difficulty alignment
- Fairness and learner experience
- Alignment between skills and measurement

Value Created

The approach supports organizations in:

- measuring capability more consistently
- improving assessment reliability
- creating scalable evaluation systems
- maintaining quality across assessment lifecycles

Skills

Assessment Design | Competency Frameworks | Instructional Design | Learning Measurement | Quality Assurance | Skills Architecture
