

AI-Assisted Learning Workflow Evaluation

Framework Overview

Focus Areas

AI Evaluation | Responsible AI | Human-in-the-Loop Design | Learning Technology | Workflow Improvement

Overview

An evaluation approach for responsible adoption of AI-assisted workflows in learning and knowledge development environments.

Professional Context

This artifact demonstrates how AI capability can be extended while maintaining quality, verification, human judgment, and accountability.

Prepared by: Saheli Basu

Version 1.0

AI-Assisted Learning Workflow Evaluation

Overview

Designed evaluation approaches for responsible use of AI-assisted workflows in learning and knowledge development environments.

The focus is not replacing expertise with automation, but improving efficiency while maintaining quality, accuracy, and human judgment.

Challenge

AI-assisted learning workflows introduce risks including:

- inaccurate information
- inconsistent quality
- weak alignment with learning goals
- over-reliance on automated outputs

Solution Delivered

Designed evaluation approaches covering:

- AI-assisted content generation workflows
- Quality validation criteria
- Human review boundaries
- Verification approaches
- Responsible automation practices

Human-in-the-Loop Approach

AI supports:

- brainstorming
- content exploration
- workflow acceleration
- pattern identification

Saheli Basu

Learning & Assessment Systems | Instructional Design | Quality Governance | Applied AI Evaluation

Human expertise remains responsible for:

- accuracy validation
- instructional quality
- learner relevance
- final decisions

The applied process flow:

Value Created

The approach helps teams adopt AI responsibly by balancing:

Efficiency + Quality + Accountability

Skills

AI Evaluation | Learning Technology | Responsible AI | Human-in-the-Loop Design | Workflow Improvement
